

— EDITION 09

The Evolution of Invisibility

Uber didn't disrupt taxis with better cars. They disrupted them by making the payment disappear. AI is about to do that to everything.

A 5-part breakdown

SWIPE >>>>

0101 / 05

The Lesson of One-Click Commerce.

Think about the magic of your first Uber ride. Arriving at your destination and simply stepping out of the vehicle without pulling out a wallet completely transformed consumer expectations.

0202 / 05

What Uber Taught Us About Cognitive Load.

Friction isn't just about the number of fields to fill out—it's about cognitive load. Removing the conscious decision-point of payment drastically increases transaction volume.

0303 / 05

Taking Embedded Finance to its Logical Conclusion.

Embedded finance put payment forms inside non-financial apps. Agentic finance goes a step further by removing the human entirely from the actual checkout interaction.

0404 / 05

The Step Beyond Embedded: Agentic Finance.

Instead of an application prompting you for a payment choice, your delegated software agent predicts the need, secures the budget authorization, and closes the transaction silently in the background.

0505 / 05

The Metric of Tomorrow: Zero-Click Conversions.

The ultimate competitive advantage for future merchants will be their ability to process frictionless, zero-click contextual transactions directly from autonomous machine networks.

— THE TAKEAWAY
