

— EDITION 30

30 Days on the Edge of Agentic Commerce

*Over the last 30 days, I've spoken with
over 50 fintech founders, bank directors,
and builders about agentic commerce.
Here are the 3 hard truths.*

A 6-part breakdown

SWIPE >>>>

0101 / 06

De-biasing the Hype From Infrastructure Reality.

After a solid month analyzing the frontier of machine-to-machine commerce, it is clear that while the long-term vision is massive, the underlying plumbing requires serious work.

0202 / 06

Truth 1: Engineers Are Ready, Compliance Is Terrified.

The technical framework for autonomous spending is fully operational today. However, institutional risk officers and bank legal teams lack frameworks to audit autonomous code actions.

0303 / 06

Truth 2: Legacy Banking Cores Are Too Fragile.

Traditional bank backends built decades ago on batch-processing logic cannot support the extreme transaction concurrency and real-time demands of automated machine agents.

0404 / 06

Truth 3: Early Winners Are Unsexy Infrastructure Middlemen.

The outsized financial returns in the early phase of this market will not go to flashy consumer assistant apps, but to the unsexy backend middleware teams solving identity, security vaults, and permissioning.

0505 / 06

| Where We Go From Here.

We are stepping out of the conceptual speculation phase and entering the hard deployment phase. The teams building robust, code-governed transactional guardrails will define the next cycle of fintech.
